02 Company Philosophy

Our vision in a picture.

Our values. What we care about.

Trust.

Integrity.

Reliability.

Fairness.

Respect.

Openness.

Honesty.

Our mission statement.

Create.

Innovative technologies for processing web-shaped materials are the historically grown core of the Jagenberg Group and have been our focus for over 140 years. We design creative and future-oriented solutions for our customers. Our thinking is entrepreneurial and our culture mid-sized. Short decision-making processes, a high level of action competence and an agile organization enable us to take successful steps into the future quickly and decisively.

Future.

We are ready to face the dynamic changes that the future holds for all of us - be it technological progress, digitization or climate change. Based on our values, we as a Group are actively working on innovative solutions to harness these megatrends in an economically and ecologically sustainable way for our customers and ourselves.

Together.

Together we are strong! This motto characterizes the cohesion in our group. We face the future as a strong team of doers and creative minds. Together with our customers, suppliers and partners, we create the future. Through a fair and trusting exchange, we learn from each other and build long-term and reliable partnerships together.

Sustainability Strategy Jagenberg Group.

Our sustainability strategy systematically signifies our commitment to take responsibility and minimize negative environmental impacts.

We respond to challenges by making the most of our strengths and skills and sharing our knowledge within the Group and with our suppliers and customers. Our comprehensive approach enables us to adopt new perspectives and develop sustainable solutions.

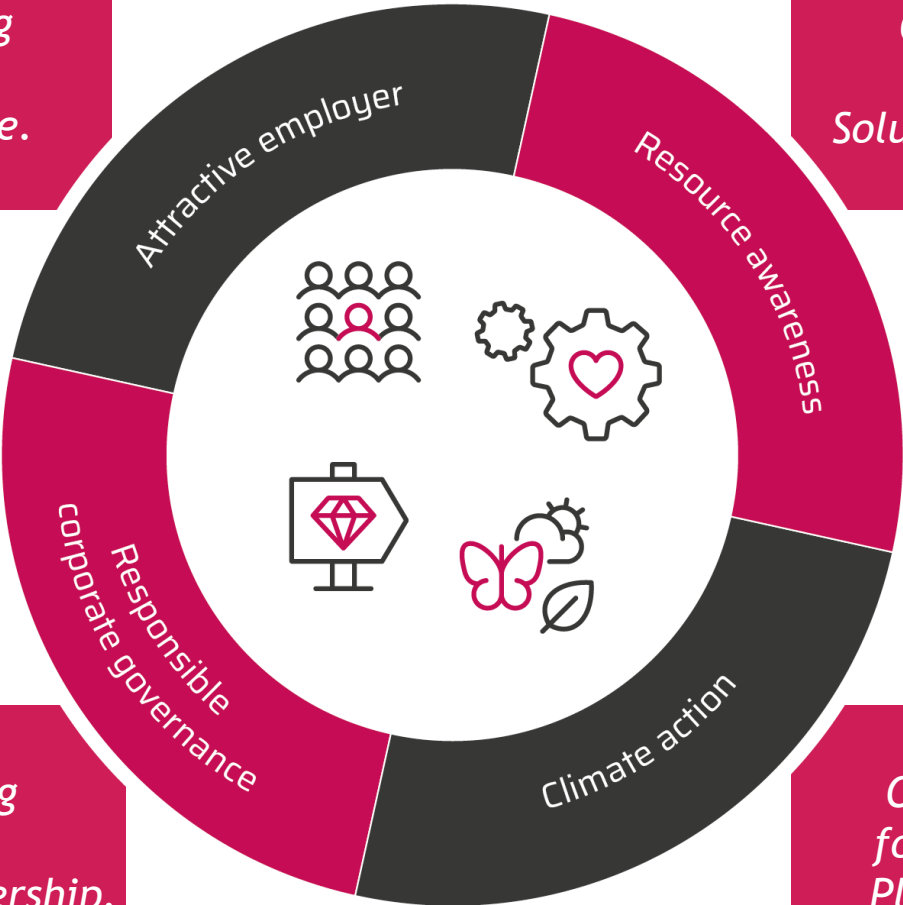

Sustainability Strategy Jagenberg Group.

*Caring
for
People.*

*Caring
for
Leadership.*

*Caring
for
Solutions.*

*Caring
for the
Planet.*

Sustainability Strategy Jagenberg Group.

We concentrate on the following action areas:

Climate action

We support the Paris Agreement and are actively helping to reduce carbon emissions.

Resource awareness

We establish a responsible approach to the use of resources along the entire value chain.

Attractive employer

As an employer, we attach great importance to treating our employees responsibly and respectfully. We create attractive conditions to promote personal and professional development.

Responsible corporate governance

In line with our value system, we act on the basis of irreproachable conduct from an ethical and legal perspective.
